Color Samples Available by request

- Back-painted glass enables architects and interior designers to add incredible beauty through color and light to interior environment designs.
- The advantages of **RJ's glass product "Floe Glass™"** include the product's reflective properties, Luminosity, practicality, installer friendliness and unrivalled durability.
- RJ's Proprietary color adhesion process produces the industry's leading time resistant, UV resistant and consistently finished products available in the market today.
- **RJ's "FLOE GLASS™"** is manufactured using **Pilkington® Optiwhite Glass supplied by Allied Glass Industries.** The low iron glass allows color perfection with the elimination of green tint found in standard glass.
- With an extensive production capability and strategic partnerships, RJ has the ability to deliver consistently excellent results at any scale.
- **FLOE GLASS** Colors are produced with extreme accuracy and repeatability, and are available in any Sherwin Williams or Benjamin-Moore paint color
